Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-29 is/are pending in the application.

- ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

1. Claims 6-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/16/05
2. Applicant's election without traverse of group I in the reply filed on 9/16/05 is acknowledged.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mauer (US 3,563,633).

Mauer discloses a phase-compensating cube corner retroreflector (Fig. 1, 4) comprising an entrance/exit face (5); a first, second and third rear reflecting faces (1, 2, 3); a phase-compensating film stack atop the first rear reflecting

face and another phase-compensating film stack atop the third reflecting face (Fig. 2, 1a, 2a, 3a, 3b) and the second rear reflecting surface devoid of any phase-compensating film stack (1b, 2b, also see column 3, lines 60-75); wherein light enters and exits the cube corner reflector with substantially the same polarization orientation and substantially the same polarization ellipticity and the phase-compensating film stack and another phase-compensating film stack each comprises a stack of thin films (column 4, lines 9-23). Mauer does not explicitly disclose the phase-compensating film stack induces $2n\pi$ phase difference. It would have been obvious to one of ordinary skill in the art to induce $2n\pi$ phase difference since it has been held that discovering an optimum of a result effective variable involves only routine skill in the art as being motivated that less chance of getting unnecessary phase shift.

Allowable Subject Matter

5. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2872

6. The following is a statement of reasons for the indication of allowable subject matter: claims are allowable at least for the reason that the prior art does not teach or reasonably suggest the multi-layers that are in the claimed order and also claimed thickness as set forth in the claimed combination.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huang (US 6,704,144 B2) discloses a prism having at least two phase-compensating surface.
